RIC-P-12 is expected to make a significant contribution to filling gaps (1) and (2) for the USSR, and to shed some light on (3) for the USSR.

Since the publication of RIR 13-56 (referred to in IAC-D-57/22), considerable improvement has taken place in the analysis of Chinese Communist agricultural data by CIA/ORA/M/AG. This improved capability has been achieved primarily through the consultation service of [REDACTED] (see report to members of the RIC Agricultural Subcommittee from Chief, M/Ag, subject "Post Mortem on RIR 13-56, "Chinese Communist Capabilities and Probable Courses of Action Through 1960," (IAC-D-57/22, 5 June 56)")

ORA Project 21-1704, "Current Chinese Communist Agricultural Programs with Particular Emphasis on Agricultural Investment and Improvements," soon to be published is expected to make a significant contribution to filling gap.
